

Never Say “I’m Bored” Again!

Have you ever been caught walking around and around the house looking for something to do? For most teenagers (and probably you) the answer is something like “Definitely! My old Playstation was great, but now that I’ve beaten all of my games, there’s nothing to do!” or “Oh my gosh, YES! I have absolutely exhausted everything fun to do in my entire house!”

Well now with the new Playstation 2, you won’t be saying that for a while. We’ve gone a long way since the first Playstation came out. For one thing, there are over fourteen-hundred featured games and each with graphics that’ll make you feel like you’re shooting the gun or driving the car! You’ll completely forget that you’re holding a controller (even though you don’t have to be because we’ve developed steering wheel and gun controllers. Who needs virtual reality?)

The whole appearance is completely redesigned, too. Now, when you go on vacation you can carry a Playstation around just like you’d carry an atlas. You’ll have over one-thousand four-hundred games, insane graphics, and a super small DVD and game player at your fingertips.

But what happens when you beat the game? That’s when you hook it up to the Internet and challenge players around the world! You now have the ability to not just *say* you’re the best player, but you can also *prove* it. Brag to your friends, your parents, and the teachers you like most.

All of this, along with a dualshock controller with over two-hundred levels of pressure sensitivity can be delivered straight to your doorstep. And, if you order in the next 7 days we’ll even send a video of how to set the system up so it’s fully functional.

So this is the Playstation: designed (and redesigned many times) just for your entertainment. Now the choice is yours. If you call and order, you’ll be very happy for a long, long time. If not, however, you might find yourself still walking around the house without a clue of what to do.
